

## SOUND BAR

### FEATURE

It makes the most of our experience and technology, and it is the latest model sound bar of the high performance which succeeded in the development. A little vibration sound can be caught clearly by the special alloy being used for the sound bar head and the part of capture sound .

The piano line of the part of vibration transmission realized light weight and the improvement of the durability by using thinner  $\phi 7\text{mm}$  than the usual steel because it was good and it was excellent in the elasticity as well to bend it.

### SPECIFICATION

NAME	LENGTH	PART of VIBRATION TRANSMISSION	MATERIAL
SOUND BAR	1.0	$\phi 7\text{mm}$	piano wire
	1.5	$\phi 7\text{mm}$	piano wire
It accepts a special order with 2.0m and 0.5m.
